

Contribution Statement

Brendon

- Created majority of backend, including all entity classes, controller classes, repository classes, service classes and interface classes. Helped to set up the database and database input. Created required unit tests for the controllers.
- Setup Github workflows
- [2023-09-17 23-43-20.mkv](#)

Shreyas

- Developed the front-end interface.
- Implemented a user-friendly search function to improve site navigation.
- Created a robust category browsing feature so customers can filter content. This category feature is integrated with the backend, meaning if the backend category name is change, it changes along with it.
- Designed and coded the HTML and CSS elements for the homepage, ensuring an appealing and responsive layout. The format and colour scheme also match up with our wireframes

Sandrup

- Worked on backend development by handling the database entries.
- Responsibilities included making SQL queries for categories, products, and items.
- Contributed to sprint management and made burndown charts to track the project's progress.
- Kept communication records with our Scrum Master and tracked the time spent in product meetings.
- [GROUP-P5-23 COSC2299-23s2 Milestone 2.mp4](#)

William

- Developed and enhanced the login, sign-up, and forgot-password pages, integrating them with the backend. This ensures user data is securely stored in the database and provides a seamless user experience, allowing them to proceed without interruptions.
- Developed and designed dedicated destination pages to which specific links can seamlessly redirect, enhancing the user navigation experience.

GITHUB CI ACTIONS

Backend was built successfully majority of the time, frontend errored due to incorrect test cases or not being able to send requests to the server.

10 September 2023

benrod 10/09/2023 18:20

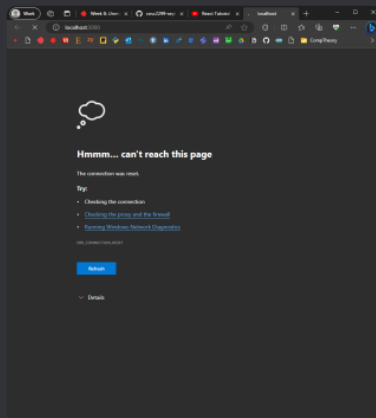

yo can u guys confirm if u can run both front end and backend
cuz project is due this weekend

11 September 2023

willhvt 11/09/2023 13:13

uh

benrod 11/09/2023 13:39

Cd into frontend and then npm start?

willhvt 11/09/2023 15:18

yea

benrod 11/09/2023 15:19

I think U might need to run npm install
To download dependencies
Cuz it might be crashing
Check terminal

sandrupskumar 05/09/2023 22:14

hey scrum master, what are some work that is assigned to me for M2?
also, i'll be back for this weeks f2f class

benrod 05/09/2023 22:21

yo

ill get some stuff done by tonight
uh by tomorrow noon could u pull the stuff and check if u can run ti
ill let u know what to do by tomorrow

benrod 06/09/2023 18:16

for backend in the data.sql file
could you create more supermakets, products and items
i commented some stuff in the file
lemme know if its unclear
its in src/main/resources

sandrupskumar 14/09/2023 14:16

yo scrum master, for the categories and stuff what type of products do you want?
ofc theres gonna be food
but did you want like detergent and stuff?
also are fruits and veg one category? or 2 seperate?

benrod 14/09/2023 14:17

I was thinking just look up the categories on Coles / Woolworths and copy the stuff from there
And for the url just get one off google

sandrupskumar 14/09/2023 14:18

sensational, will do that now

 **sandrupskumar** also are fruits and veg one category? or 2 seperate?

benrod 14/09/2023 14:18

U can break it up like that if U want
But I reckon leave that till if U can't fill in all categories

sandrupskumar 14/09/2023 14:18

got it. 👍

sandrupskumar Today at 12:23

ok, i think i finished the db bit
what part of the test cases need help (edited)

benrod Today at 13:02

Can U do test cases for user controller/service
Ill do for the productd

 **sandrupskumar** what part of the test cases need help (edited)

benrod Today at 13:03

There's already a file in the test folder which has 1 user test

 **@benrod** Can U do test cases for user controller/service

sandrupskumar Today at 13:04

sweet, i'll look into that now

benrod Today at 13:04

There's modules on canvas U can use as reference

benrod Today at 13:14

If U made a doc for burn down invite me to it
Ill help
s3945693

benrod 11/09/2023 15:19

I think U might need to run npm install
To download dependencies
Cuz it might be crashing
Check terminal

willhvt 11/09/2023 15:39

i did that already
ill try it on my pc
when i get home

SV10 12/09/2023 14:53

how are we meant to run it?

benrod 12/09/2023 15:17

I Ur terminal make sure Ur in the frontend directory
Npm install
Npm start
Also make sure to run the java superrice file in Backend b4 npm start
[@willhvt](#) did it work?

SV10 12/09/2023 15:36

```
Npm : The term 'Npm' is not recognized as the name of a cmdlet, function, script file, or operable program. Check
the spelling of the name, or if a path was included, verify that the path is correct and try again.
At line:1 char:1
+ Npm install
+ ~~~~~
+ CategoryInfo          : ObjectNotFound: (Npm:String) [], CommandNotFoundException
+ FullyQualifiedErrorId : CommandNotFoundException
```

am i doing smt wrong

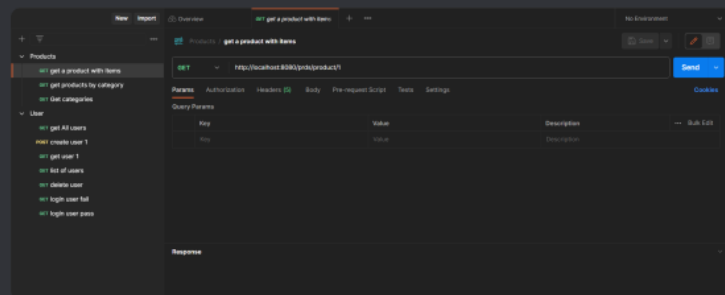

SV10 Today at 17:47

idk i just reset it

1

can u explain how postman works again

so im looking at this

benrod Today at 17:51

so the product category calls upon the product service
and the user does the usr service
so when u hit send for get all users
it will send a post request to the server and display the information it got back
its just for testing

17:52

and making sure the request u send to the server is meant to return something
ive set up all different ways u can access information from the server within it

 **benrod** 12/09/2023 16:26
@here brach out, make feature then brach back into main
i kinda fucked up by not doing that
we r marked on this

 **SV10** 12/09/2023 16:27
like when doing front end pages?

 **benrod** 12/09/2023 16:27
yeah
for each page i reckon we should make a branch

 **SV10** 12/09/2023 16:27
ok bae

 **benrod** 12/09/2023 16:27
and ill do the same for each servic eon back end
feature-backend-featureName or feature-frontend-featureName
like this ?

 **SV10** 12/09/2023 16:30
yea sure
so a feature name would be like Homepage
?
or like login

 **benrod** 12/09/2023 16:30
yeah

 **SV10** 12/09/2023 16:30
bet
also i tested it with backend it works

 **benrod** 12/09/2023 16:31
for each folder u create for the pages in frontend

SV10 started a call that lasted 17 mins. 28/08/2023
